Workshop Presenters

Science Teachings Solutions, Inc. is an educational provider and consulting company specializing in science and educational services related to math (for science) and science courses (curriculum development and preparation of students) especially nursing and related medical profession. We also have experience in integrating English, Mathematics/ and Algebra subjects towards both preparation for and learning of science.

Dr. Yogesh Arora has extensive experience in Math and Science education. He has been in this field for over 30 years with hands-on experience in the class room as well as in the laboratory. He has been involved in Conceptualized Teaching in Math and recently presented at California Student Success Conference. Dr. Arora is currently developing courses such as TEAS, Math for Science, Math for Healthcare Workers and Medical Terminology.

Chander Arora, Ph.D., has extensive experience in Math, Science and English education. She has evolved to be an educator integrating her knowledge of Science with customer service and employability skills for Healthcare professionals. She has been in Health and Science for over 29 years with over 40 publications in national and international journals. She travels extensively sharing her findings and experiences at national/international forums.
